Education

- **Indian Institute of Information Technology, Sricity** — Sricity, India
  Bachelor of Engineering in Computer Science and Engineering (CGPA: 8.74) — *Dec 2021 – May 2025*

Experience

- **Cyware** — Bengaluru
  Software Engineer I — *Aug 2025 – Present*
  - Built multiple mobile-app features in Flutter, boosting usability and increasing engagement by 15%.
  - Developed new company website in Next.js, improving load times, SEO, and organic traffic by 20%, while reducing API calls to cut CMS costs 25%.
  - Solved AWS SES rate limiting by implementing a queue-based email system, reducing failures by 40%.
- **Cyware** — Bengaluru
  Software Engineering Intern — *Dec 2024 – Jul 2025*
  - Architected and implemented application-level observability metrics, enabling early detection of issues and reducing customer-reported problems by 30%.
  - Optimized database queries and API performance, reducing response latency by 83%.
  - Demonstrated strong problem-solving skills and adaptability working with diverse technology stacks.
- **Bitezy** — Remote
  Full Stack Developer — *Mar 2024 – Aug 2024*
  - Engineered multi-client architecture (restaurant, customer, delivery) used by 3 distinct user types.
  - Implemented WebSocket-based live order tracking, improving communication efficiency by 40%.
  - Optimized system performance, handling over 1000+ orders and driving 4L revenue growth.

Projects

- **SwiftFrame**
  Docker, Flink, Kafka, Postgres, Python, Grafana, Java — *Jan 2024 – Feb 2024*
  - Built scalable real-time stream processing engine, achieving 955MB/s throughput with 130ms latency.
  - Simulated data ingestion with Python, transmitting 60K records/min into Kafka.
  - Orchestrated Flink processing and persisted outputs to PostgreSQL with monitoring on Grafana.
- **Load-balancer Simulation**
  Docker Swarm, NGINX, Flask, Python — *Dec 2023 – Jan 2024*
  - Designed and simulated dynamic traffic routing using round-robin and custom load-balancing logic.
  - Improved system scalability by 30% via Docker Swarm orchestration and NGINX configuration.
- **Travel Planner Pro**
  ExpressJS, TypeScript, ReactJS, MongoDB, MapBox, JWT — *Jul 2022 – Aug 2022*
  - Enhanced UI/UX for itinerary planning app, boosting engagement by 30%.
  - Minimized signup issues by 25% with robust validation and user feedback.
  - Delivered project MVP in 3 days with a 4-member agile team using Git for collaboration.

Technical Skills

- Languages & Databases: Python, C, C++, JavaScript, Java, Go, MySQL, MongoDB, Redis, PostgreSQL, Dart
- Frameworks & Libraries: React JS, Node JS, Django, Socket.IO, Pandas, Flink, Kafka, Flutter, Celery, Next.js
- Tools & Platforms: Docker, AWS, GCP, Firebase, Git, Netlify, Digital Ocean

Honors and Awards

- Received Cyware's "Above & Beyond Award" for exceptional leadership, surpassing expectations beyond the call of duty.
- Company Hackathon Winner (2025): Built an AI-based automated SEO optimizer that secured first place in Cyware's internal hackathon.
- Conference Paper (2024): Published "SwiftFrame: Developing Low-latency Near Real-time Response Framework" at ICCCNT.
- Hackathon Winner (2023): Won Flipr Hackathon 18.
- Open Source: Completed Hacktoberfest 2022, contributed to multiple repositories.
- Competitive Programming (2022): Participated in Inter-NIT 7-day Coding Competition.
- Problem Solving: Solved 550+ problems on LeetCode.
